Anti-Cancer Initiatives of CRPF

The fighting spirit of CRPF against the enemies of the Nation is well documented in the collective consciousness of the people. The same spirit inspires its outreach against Cancer- the most insidious of the enemies of the human body.

CRPF is fully sensitive to the cancer care needs of its personnel. The Force has advised all members of CRPF families to undertake annual medical examination in all seriousness since early detection is the surest way to eliminate this menace. Educating the Force personnel on life style management, augmenting body immunity through appropriate diet intervention and regular Yoga sessions as part of 'Fit India Campaign' are some of the preventive measures taken by the Force to obviate any cancerous tendencies.

CRPF, in collaboration with Cansupport, an NGO organized a 'Walk for Life' to generate awareness against cancer in new Delhi. A number of dignitaries including Dr.A.P.Maheswari, DG, CRPF attended the programme.

Instances of CRPF personnel and their family members facing the onslaught of cancer has been surfacing at

intervals. The Force has lost 56 of its personnel in 2019 while 179 personnel are presently being provided treatment in as many as 37 recognised hospitals across the country. The figures are quite low for a Force having 3.25 lakh personnel. This could be the fall out of a number of steps being taken by CRPF to the ward off this killer disease. In view of this, CRPF has not only geared up to handle such cases but gone beyond it to have MoU with various domain hospitals to facilitate effective treatment at various places such as in Mumbai, NCR of Delhi, city of Bangalore and other towns where better expertise is available in the private sector. Providing logistic support to care-takers of such patients besides sensitising them on cancer care are almost part of the cancer-fighting strategy of the Force. CWA-CRPF Family Welfare Association- the body of CRPF families has also collaborated with civic society organisations to evolve better response in this field collectively.

CRPF also extends help to the community through its systemic and experiential expertise wherever required & feasible. On the World Cancer Day, CRPF throws its weight behind the collective effort to fight off cancer as well.

CRPF organises Bharat Darshan Tour for Kashmiri Students

We need to ensure the safety and security of our country so that progress can happen. And that is possible when we come together, sit together and work together-said Dr. A.P. Maheshwari, D.G CRPF while addressing a group of students from Jammu and Kashmir in New Delhi. Interacting with the students who were out on Bharat Darshan tour organised by CRPF, Dr Maheshwari advised them to expand their love so that they themselves could be the Universe-all inclusive and unparalleled. Addressing the students as 'friends', he wished them luck in their educational pursuits, while promising them all possible help and support of CRPF in career counseling and skill

development. He said that the coming together of the students of Kashmir and the CRPF is not just a temporary affair but a lifelong friendship.

Before parting, Dr. Maheshwari presented them mementoes on behalf of CRPF. Senior officers from MHA and CRPF were present on the occasion.

CRPF has been conducting Bharat Darshan tour for the students of Jammu and Kashmir to familiarize them with the country's rich landscapes of geography and culture. The batch of about 50 students and teachers from Gandarbal district of Kashmir was the 5th one in a series of 9 such exposure trips being organized

by CRPF during the current year. The students visited Mumbai and Delhi and acquainted themselves with the rich historical and cultural legacy of both these metro cities before being flown back home. Belonging to BPL families from rural areas of Kashmir, almost all of them admitted to having travelled outside their locality for the first time and also having experienced their maiden air travel.

A total of around 450 students are targeted to be taken out in Bharat Darshan tour in 9 phases which commenced from 18th December last year and will terminate on 31st March 2020. The earlier batches of students in the age group of 14-18 years have already visited places like Mumbai, Chennai, Hyderabad, Bangaluru and New Delhi.

CRPF has been deeply engaged with the people of Jammu and Kashmir through a variety of innovative outreach programmes like the Bharat Darshan Tour

and MADADGAR- the toll-free helpline 14411. Simultaneously the Force has been trying to de-radicalise the misled youths of Kashmir and to mainstream them. One of the express objectives of the Bharat Darshan tour of Kashmiri students is to expand their exposure to the country's rich socio-cultural and religious heritage thereby making them ambassadors of peace.

दिनांक 27/02/2020 को सी.आर.पी.एफ. के लगभग 50 जवान नई दिल्ली के जीटीबी अस्पताल पहुंचे। इनके वहां पहुंचने का मुख्य उद्देश्य यह था कि ब्लड बैंक में रक्त की कमी को पूरा किया जाए जो फिलहाल राजधानी में हाल ही में हुई गड़बड़ी/उपद्रव के पीड़ितों के इलाज के लिए आवश्यक था। रक्त दान करने के बाद, इस वादे के साथ कि अस्पताल में रक्त की जब भी जरूरत पड़ेगी हम अधिक रक्त की जरूरतों को पूरा करेंगे।

स्वैच्छिक रक्त दान के मामलों में, यह एक यह एक ऐसा नैतिक कर्तव्य है जिसे सी.आर.पी.एफ. के जवान हमेशा आगे बढ़ कर पूरा करते हैं। मानवता की भावना के विस्तार में, बल के 500 से अधिक अधिकारियों और जवानों ने ट्रांसफ्यूजन मेडिसिन विभाग, एम्स, नई दिल्ली द्वारा आयोजित महा रक्त दान शिविर में रक्तदान किया।

इससे पहले, बल के जवानों को एक संदेश में डॉ० ए.पी.माहेश्वरी, महानिदेशक, के.रि.पु.बल. ने कहा कि साथी देशवासियों के लिए रक्त दान करने की उपयोगिता ने उन्हें काफी प्रभावित किया था। उनके निर्देशन में 19 मार्च 2020 को 81वीं वर्षगांठ समारोह के अवसर पर देश भर में के.रि.पु.बल के प्रत्येक युनिट/संस्थानों में रक्तदान शिविरों की एक श्रृंखला आयोजित की जा रही है।

रक्तदान करने वाले सी.आर.पी.एफ. के सदस्यों की कुल संख्या 6959 है जबकि बल के द्वारा वर्ष 2019 में ही 154 रक्तदान शिविरों का आयोजन किया गया है। किसी भी बल के लिए यह एक सुखद पहल है। कोई भी इंसान अच्छी तरह से कल्पना कर सकता है कि के.रि.पु.बल जवानों द्वारा दान किए गए रक्त से कितने अनमोल जिंदगिया बचायी गई होंगी।

बढ़ाएं देश की शान आओ मिल कर करें रक्त दान

GOLDEN JUBILEE OF 10TH BATCH OF DAGOs

We, the 10th Batch of DAGOs, celebrated our very special Golden Jubilee Reunion on 15th December 2019 in one of the best venues in CRPF – Group Centre and CRPF Academy Gurugram. This is a vast and beautiful campus with all modern facilities. It being comparatively new, some of us visited the campus for the first time.

Our batch started CRPF Journey on this day 50 years back in Central Training College (CTC) Neemuch (MP) and we have put in average 37 years or so long service and since retired more than a decade ago.

Our batch originally consisted of 28 officers but two officers had to leave during the training period so only 26 passed out. Two officers left within a period of five years and five died unfortunately during service and two after retirement that too during 2019 only. Out of the remaining eighteen Officers, sixteen

Officers attended the Reunion except two (one was in Canada and the other had some medical problem). Thus the participation was extremely good. Another feature was that we participated with spouses as well as children and grandchildren making the reunion unique and one of a kind. We were fortunate enough that our Vice Principal and incharge of Basic Training Sh. R.M. Sahai also blessed us by his presence. He

was not only our trainer but also the trainer of IGP Randeep Dutta of Academy and Shri Bhanu Pratap Singh, DIG, GC as D.D. I.S.A. who made excellent arrangements for our reunion. In sum there could not be a better Chief Guest than Sh. Sahai .

To reminisce a little our Basic training commenced on 15th December 1969 in CTC, Neemuch. Our Principal was Lt. Col. Umrao Singh who used to supervise us mostly from a distance in his jeep with his majestic Alsatian dog on back seat. Outdoor training incharge was Subedar Brij Lal, a hard task master and believer in 'less the education, the better' it is for soldier type life in CRPF. Perhaps he was right in his life time situation in CRPF which was dealing insurgency in North East particularly Nagaland, Mizoram and Manipur. Our 'ustads' in CTC Neemuch were also averse to higher education and were keen to de-educate in their own ways like our drill instructor by constant 'Kadamtal' even on tarred road so that unnecessary higher education above Matric level disappears quickly. (Pahli das class rakhunga baki sab bahar). We had also heard some of the 'pearl of wisdom' specially distilled for CRPF life 'Hukum moro mat, Tinka todo mat, Langar chhoro mat!' and also that in CRP 'Langar Gazette' is the most reliable source of information. CRP acronym is 'Chalte Raho Pyre' because of frequent movements at short or no notice.

Having started life like that and having worked in varied types of situations throughout country and in my case six years abroad in two Indian High Commissions, enduring all transfers, promotions, movements, even long stagnation in one rank, having completed decades of long years in service and still

surviving after a decade plus of retirement is no small miracle indeed. We all celebrated it in this Golden Jubilee Reunion.

Golden Years: We had passed out in Oct 1970, Passing out Salute was taken by then Chief of Army Staff General Sam Manekshaw, later Field Marshal and hero of 1971 war with Pakistan and liberator of Bangladesh. At times, this seems just yesterday and at other times it seems eons of years ago. For a long personal association of batchmates, a half century is a memorable milestone. We all have come out of it but CRPF has not come out of us!!

Assembling in Gurugram CRPF Campus was a nostalgic experience for all of us. When we joined, CRPF was small, just 52 Bns. In fact they were only 17 Bns three years before but by the time we joined many India Reserve Bns were merged in CRPF from various states. First DG of CRPF, Shri V.G. Kanetkar, IPS had just handed over charge to the second DG, Shri Imdad Ali, IPS. At that time, States had no DGs, only IGs. So DG CRP and DG BSF were top in hierarchy in the country.

CRPF is a mighty Force now and known to be the largest Para Military Organization anywhere in the world. We are indeed proud to have been part of this great organization.

The entire batch is extremely thankful to Group Centre, and CRPF Academy Gurugram who helped arrange this memorable event in great style. We will always cherish the memory. We are grateful that our Guru, Mentor and in-charge Basic Training was there with us to bless us even after half a century.

Although CRPF has changed in a big way, this is new CRPF adapting to new challenges and conditions in our country. But in many ways, there is continuity in change and many basic ethos and esprit de-corps remains intact since its inception in 1939.

We look forward to future Reunions till it is possible. One of our batch mates has quoted the following Urdu couplet during our reunion.

"उजाले अपनी यादों के हमारे साथ रहने दो।
न जाने किस गली में ज़िंदगी की शाम हो जाए।"

एक अनोखा मुकदमा

हव./जी.डी. राम भवन यादव
आर.टी.सी., के.रि.पु.बल, पेरिंगम

न्यायालय में मुकदमा आया जिसने सभी को झकझोर दिया। अदालतों में प्रोपर्टी व अन्य पारिवारिक विवाद आते हैं, मगर ये मामला बहुत अलग किस्म का था। एक 60 साल के व्यक्ति ने अपने 75 साल के बूढ़े भाई पर मुकदमा किया था। मुकदमा यह था कि मेरा 75 साल का बड़ा भाई जो बूढ़ा हो चला है, और खुद अपना ख्याल भी ठीक से नहीं रख सकता, मेरे मना करने के बावजूद, हमारी 95 साल की माँ की देखभाल कर रहा

है। मैं अभी ठीक हूँ, सक्षम हूँ इसलिए अब मुझे माँ की सेवा करने का मौका दिया जाए। न्यायधीश महोदय जी का दिमाग घूम गया और मुकदमा भी चर्चा में आ गया। न्यायधीश महोदय ने दोनों भाइयों को समझाने की कोशिश की। आप लोग महीने में 15-15 दिन माँ को अपने साथ रख लो। मगर कोई टस से मस नहीं हुआ। बड़े भाई का कहना था कि “मैं अपने स्वर्ग को खुद से दूर क्यों होने दूँ”। अगर मेरी माँ को मेरे पास कोई परेशानी है तो, वह माँ को ले जा सकता है। आखिर उन्होंने माँ की राय जानने के लिए उनको बुलवाया और पूछा कि वह किसके साथ रहना चाहती है। माँ बोली तुम दोनों मेरे लिए बराबर हो। मैं किसी एक के पक्ष में फैसला सुनाकर दूसरे का दिल नहीं दुखा सकती। आखिर में न्यायधीश ने भारी मन से निर्णय सुनाया कि न्यायालय छोटे भाई की भावनाओं से सहमत है कि बड़ा भाई वृद्ध हो गया है। ऐसे में माँ की जिम्मेदारी छोटे भाई को दी जाती है। यह फैसला सुनकर बड़ा भाई रोने लगा यह सब देखकर अदालत में मौजूद न्यायाधीश तथा सभी के आँखों से आंसू छलक आये। कहने का तात्पर्य है कि अगर भाई बहनों में विवाद हो माता-पिता ओल्ड ऐज होम में रहते हैं तो यह पाप है। धन – दौलत, गाड़ी, बंगला होकर भी यदि माँ बाप को सुखी नहीं रख सके, तो आपका वह धन – दौलत किसी काम का नहीं है।

PAIN

CT/GD (Mah) Smitha. AV
RTC, CRPF, Peringome

An uncomfortable feeling arising within us as a result of a sudden and forceful touch or entering of a foreign body in our body. But this can only be considered as one of the aspects, a person feels pain. There are various other reasons as well. Amputation of body parts too can cause pain. Cancer, a well-known disease for all of us which is caused due to the uncontrollable increase or multiplication of cells in a human body, causes huge pain.

A woman undergoes severe pain during child birth. One of the other reasons why people feel pain is

losing their loved ones due to death. I lost my father in the year 2014 and the pain haunts me even today. This can even lead a person to ailment, coma, loss of memory, depression and so on. Separation of the dear and near ones can also lead a person to feel terrible pain.

As we all know, man is a social animal, hence he always needs to socialise with other men in his day to day life, and his mingling with his fellowmen creates a sort of intimacy between them. And there comes a day in his or her life that, they both need to be separated leaving both the persons involved in immense pain. The feeling of rejection and loneliness is also a painful situation a person undergoes. I have often experienced this pain which made me end up in sleepless nights, difficulty in breathing and suffocation. The pain is so dreadful that we even think of ending our life. But still, one thing we should understand as the scripture says, God never puts a person in tests and temptations and he never allows anything in a man's life that he can't bear. The pain is the aftermath of our mere wrong choices in life, which is not the will of God.

हम खाकी हैं!

अभिनव आनन्द,
द्वितीय कमान अधिकारी,
214 बटालियन के.रि. पु. बल

सी.आर.पी.एफ. में रहकर अपने बच्चों के स्कूल एनुअल डे को देखने का मौका कम ही हाथ लग पाता है। एक चाँस मेरा भी आया और उसी चाँस पे डाँस हेतु मैं नवाबों के शहर लखनऊ में सपरिवार स्कूल जा पहुँचा। पता चला आई. जी. कार्मिक चीफ गेस्ट हैं। मेरी धर्मपत्नी ने मुझसे असमंजस में पूछा, मुख्य अतिथि कार्मिक जी श्री हैं या श्रीमती! बड़ा मार्मिक लगा। मैंने कहा, भाग्यवान! कार्मिक संज्ञा नहीं संज्ञा की पदवी है। जैसे HR, Pers आदि। कुसूर यू.पी. पुलिस का नहीं पर दिक्कत हिन्दी के 'क' क्षेत्र का तत्सम शब्दों को फेविकोल की तरह चिपका लेने की है। और हाँ। आज झारखण्ड से प्रकाशित एक अखबार को पढ़कर कमोबेश वैसी ही 'देजा वू' वाली फीलिंग आयी। खबर के मुताबिक राज्य पुलिस के आई. जी. प्रोविजन और डी.आई.जी. बजट सेवानिवृत्त हुए और इस विदाई के मौके पर उनके उज्ज्वल भविष्य हेतु ए.डी.जी. आधुनिकीकरण ने बधाई दी है। अब आम आदमी ऐसे ढेरों पदनाम पढ़कर अपने सिर के बाल न नोंचे तो और क्या करें? हमारी खाकी में भी अंतर थोड़े ही जो है। यहां पल भर में कोई D-C- 'स्पेशल' हो जाता है तो कोई D-C- 'जनरल'। कमान्डेंट 'पोल' पर अभी नहीं आऊंगा। धृष्टता होगी। वैसे तम्बोला में 'बम्बू' तो सुना और खेला है।

पत्रकारों की बिरादरी भी हम खाकी वालों की पदवी से कन्फ्यूज ही रहती है। सिविक एक्शन प्रोग्राम हो या फिर इलाके की ऑप्स उपलब्धि। अगले दिन की खबर में असिस्टेंट कमान्डेंट भयंकर मेटामॉर्फोसिस होकर असिस्टेंट कमान्डर बन जाता है और यूनिट के समादेष्टा महोदय को भी सहायक सेनानी बनते देर नहीं लगती। द्वितीय कमान अधिकारी की जमात का क्या! टू आई. सी. वाला शॉर्ट कट भी इन पत्रकारों के पल्ले नहीं पड़ता। खबर से ही गोल हो जाता है बेचारा यह पदनाम।

अच्छा एक और बात। पुलिसिया डर समाज के हर वर्ग में रचा-बसा है। तभी तो छोटे-छोटे कस्बे में आज भी थाने का दरोगा सरस्वती पूजा पर विद्यालयों में मुख्य अतिथि बन ज्ञान की गंगा बहाते हुए भाषण देता जाता है और बगल में शिक्षाविद और बुद्धिजीवी ताली बजाते नजर आते हैं। अगले दिन ऐसी ही तस्वीरें चस्पा रहती हैं अखबार की लोकल खबर के पन्नों पर।

अब आते हैं P-R- एक्सरसाइज पर। अमूमन सभी राज्यों की पुलिस न्यूजपेपर का एक बड़ा कार्नर स्पेस अपने संगठन की अच्छी पहचान

स्थापित करने के लिये प्रचार हेतु लेती है। जैसे बूढ़े को सहारा देती हुई महिला ट्रैफिक पुलिस की जेब्रा क्रॉसिंग पर स्माइलिंग फोटो। पर P-R- के फॉलो-अप का failure कहिये या मीडिया वालों की नालायकी, उसी पेज के दूसरे कार्नर पर 'घूस लेते धराये ट्रैफिक पुलिस', 'रक्षक बना भक्षक', "फिर एक बार खाकी दागदार... शर्मसार... आदि-आदि सावधान इंडिया टाइप न्यूज मंडराते नजर आते हैं। नतीजा निल बटे सन्नाटा! कमोबेश वैसा ही जैसे बैंकों का कस्टमर फ्रेंडली विज्ञापन और बैंक के अंदर कस्टमर का न खत्म होने वाला शिकायती ज्ञापन...ये दोनों ही 'जन्मों के साथी... हम साथ-साथ हैं' टाइप रेल की दो पटरी माफिक चलते रहते हैं।

चलते-चलते आखिरी बात। अभी मेरी नजर यूनिट के डॉग स्क्वाड के नॉमिनल रॉल पर पड़ी है। एक नाम सी. आर.पी.एफ. में शामिल बेल्लिजन शेफर्ड ब्रीड के पुराने K9 में एक A-M-Stoopy का भी है। A फॉर अल्फा जो उसका बाप था; M फॉर मोनी जो उसकी माँ। ऑप्स राइटर ऑफिशियली उसे Amstoopy घोषित करता है। और जवानों ने इस टेढ़े नाम का शर्तिया देसी इलाज ढूँढा है। उसे M-S-Trophy पुकारते हैं। जैसे पुराने सी. एच. एम. की भाषा में कंबाइंड (combat) ड्रेस पहनकर श्रीनगर के डाउन टाउन (downtown) में ड्यूटी जाने के लिये फॉल-इन होना होता है। अब ऐसी अंग्रेजी से terrain कैसे negotiate होगा और स्ट्रेंथ कैसे augment होगी? Force Multiplier तो जवानों की डिक्शनरी में दूर-दूर तक नहीं। किन्तु सी. आर.पी.एफ. की पैदल सेना पर हम सबको गर्व है जब एक जवान यह बोलता है... हमें तो GR मालूम है साहब जी! गिट-पिट अंग्रेजी से डर लगता है साहब! GR से नहीं। कहाँ चलना है बताइये तो।

Real Time Video Surveillance

Real time video surveillance Technology has been identified as key arsenal in security enhancement and emergency response system. Use of technology in policing has redefined the whole of Police Public relationship. The challenges of police and security forces are increasing due to paradigm shift in demographics, value and most importantly Technology.

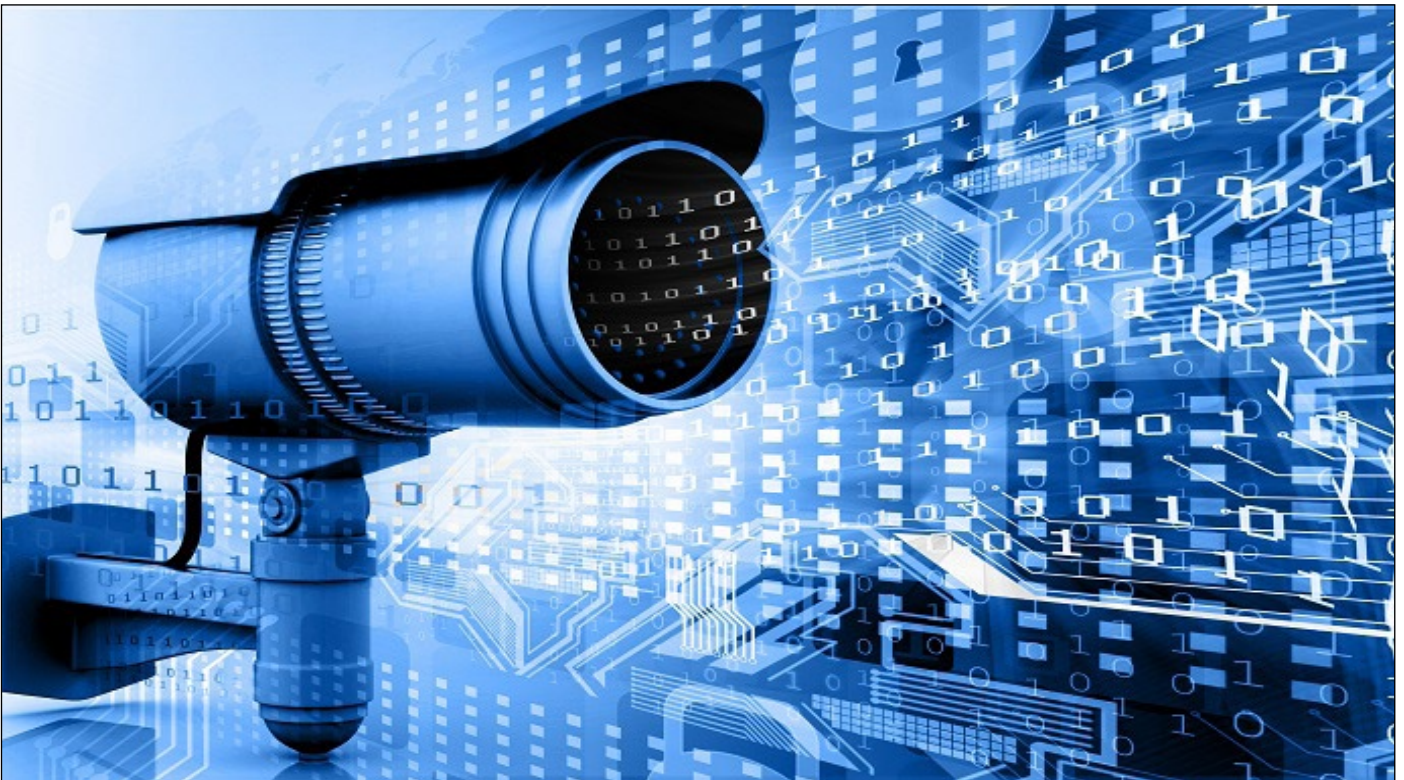

Today cities face a wide range of threats ranging from terrorism, civil unrest to kidnapping and murder. So to mitigate these threats, it is critical for the authorities to capture real time information happening in and around the city. The need of the hour is to have an advanced real time video surveillance and analytic system that can flag potential problem and quick interventions. Today we have software solutions for both real-time and post event image analysis, through which we can analyze large quantities of raw videos and images, automatically identifying, classifying and flagging points of interest throughout the recording. Today we are living in a data driven world. Saying

Karmveer Singh Yadav Dy.Comdt,
CIT, Bangalore

goes that data is the “new oil”. So data is at the heart of video surveillance and Data Analytics develops hindsight into insight and further into foresight.

In today's, cutting edge technology we have modern hardware and software like intelligent analogue and IP video surveillance equipments ranging from CCTV camera to high definition IP video surveillance network camera, mobile DVRs, video server, video decoder, and video management software for end to end surveillance and imaging. Moreover today's modern and smart cameras are equipped with artificial intelligence & deep sense algorithm-an advance capability to learn over a period of time. These technologies can identify a person's age, colour,

gender, emotions and a host of other features. It can also be applied to vehicles. Now smart camera can adapt to ambient conditions for better pictures and use compression format that reduces file size while keeping 4K quality. Now AI with machine learning, deep learning and neural networks has capabilities to analyse video and generate crowd alerts, wire tripping ANPR and RLVD compliance, heat sensing, presence or absence sensing, face recognition, intelligent traffic management etc. There are extensive powerful video analysis methods and tools that are deployed in a number of application domain including surveillance and security application like motion detection, tripwires, object removal or abandonment, facial recognition, licence plate recognition etc., enable video surveillance to become a proactive monitoring tool that signals the need for immediate intervention. Induction of artificial intelligence (AI) in video Analytics helped police to do early detection and effective intervention and thus minimal loss AI can support “predictive policing” in the following ways.

As AI decodes human gestures, language, motion and mood, so a surveillance team can get alerts like crowd building, covered faces, mob distress, fight, trespassing, and vandalism.

1. Automatic number plate recognition (ANPR) and face recognition.
2. Crowd management.
3. Tracking objects.
4. Accident pattern monitoring.
5. Biometric identification.

Ideally any video surveillance system should be able to cover following features

1. The video Surveillance kit must have the capacity to capture crowded area.
2. The camera must cover Narrow panes.
3. Situational awareness.
4. Intrusion protection.
5. Wanted personal.
6. Vehicle identification.
7. Crime prediction.
8. Digital forensic search.
9. Stop line/ red line/ speed violation detection.
10. Voice evacuation system.
11. No helmet detection.
12. Wrong direction movement detection.
13. Drone detection.
14. Sound detection.

15. Automatic incident detection.
16. Traffic data collection.
17. Parking management.
18. Video-based penalties.
19. Intersection control.
20. Vehicle status control.
21. Pedestrian crossing.
22. High quality image like 4K Ultra HD.

Finally, video surveillance technology is one of the major trends that is going to affect Public Service Delivery. But we must keep in mind that integration is the key. The government agencies should stop working in silos and start synergizing their Technologies through a collaborative monitoring framework for surveillance system under which various types of surveillance camera and networks can be integrated in a single platform using standardized protocols methodologies, technologies and architecture. The different agency should have a single command and control when it comes to emerging emergency management.

Protocols need to be standardized for better interoperability so that public can easily plug into any emergency response system. All cameras must adhere to a single standard. The Open Network Video Interface (ONVIF) & Physical Security Interoperability Alliance (PSIA) are currently the two most popular video surveillance protocol, however claims of complying to these two standards in full need is to be carefully verified.

Also transmission of the huge amount of data generated by the camera will be a major challenge. The smarter network architecture, more efficient protocol, preliminary screening analysis at the edge, use of fewer frames for analysis and cheaper data regime will reduce cost in the long run.

There is a need to leverage the power of cloud based technologies to deal with the problem of managing mammoth amount of data generated everyday and strengthening predictive analysis capability.

Finally, as the right to privacy is a fundamental right so our data enabled development must also address privacy concern. Through Technology agnosticism, Holistic application, informed consent, data minimization, structured enforcement, and deterrent penalties, we can ensure data privacy of our citizen as well as real time video surveillance.

Leprosy: A Curse or a Disease

INTRODUCTION

Leprosy is a chronic infectious disease caused by *Mycobacterium leprae*. It is highly contagious, but its morbidity is low because a large portion of the population is naturally resistant to this disease. Leprosy affects mainly the skin and peripheral nerves. Its diagnosis is established based on skin and neurologic examination of the patient. Early diagnosis is very important. The timely and proper implementation of treatment will prevent sequelae and physical disabilities that have an impact on the individual's social and working life, which are also responsible for the stigma and prejudice regarding this disease.

HISTORY

This disease has been known as leprosy since the biblical times, with reports of cases dating over 3000 years ago. There are doubts whether leprosy originated in Asia or Africa. The term Leprosy is a tribute to the Norwegian physician Gerhard Armauer Hansen, who identified the bacillus *Mycobacterium leprae* as the cause of the disease in 1873.¹

Leprosy is believed to have been introduced in Europe from India by the troops of Alexander, the Great, 300 BC. Its incidence was high in Europe and the Middle East during the Middle Ages. The number of cases was dramatically reduced around 1870 because of the socioeconomic development.

The main strategy used to prevent the spread of leprosy in the past was the compulsory isolation of patients in leper colonies. With the introduction of sulfone in the 1940s and its use in the treatment of leprosy due to its effectiveness, isolation was no longer mandatory; however, it was only officially abolished in 1962. Nevertheless, until the mid-1980s,

Dr. Vipin, MO

many patients still remained isolated for several reasons. Because of cases of resistance to sulfone monotherapy in 1970, the World Health Organization (WHO) suggested the use of multidrug regimens. Therefore, since the early 1980s, the disease has been treated with multidrug regimens in outpatient settings and patients are considered cured after treatment. The term *hanseniasis* was proposed to reduce the stigma associated with the disease in 1967 by Professor Abraão Rotberg.

Mechanisms of leprosy transmission

It is believed that leprosy transmission occurs by close and prolonged contact between a susceptible individual and a bacillus-infected patient through inhalation of the bacilli contained in nasal secretion. The main route of transmission is the nasal mucosa. Less commonly, transmission can occur by skin erosions. Other transmission routes, such as blood, vertical transmission, breast milk, and insect bites, are also possible.

It is assumed that infected individuals, even those who did not develop the disease, may have a transitional period of nasal release of bacilli. The presence of specific DNA sequences *M. leprae* in swabs or nasal biopsies and seropositivity for specific bacillus antigens in healthy individuals living in endemic areas suggest the carrier plays a role in the transmission of leprosy.

Symptoms of leprosy

The symptoms of leprosy can present differently in different people with the condition.

The main symptoms include:

the appearance of skin lesions that are lighter than normal skin and remain for weeks or months.

patches of skin with decreased sensation, such as touch, pain, and heat muscle weakness numbness in the hands, feet, legs, and arms, known as “glove and stocking anesthesia” eye problems enlarged nerves, especially in the elbows or knees stuffy nose and nosebleeds curling of the fingers and thumb, caused by paralysis of small muscles in the hand ulcers on the soles of the feet.

Injuries, breaks, and burns can go unnoticed, due to the numbing of sensation caused by nerve damage, potentially becoming infected or more seriously injured. Over time, the extremities can be lost to repeated damage.

The wounds are also more likely to become infected, as immune defenses are weakened by leprosy. The reabsorption of cartilage by the body means that these secondary infections can result in tissue loss. This leads to the characteristic shortening of the toes and fingers seen in leprosy.

Damage to the mucous membrane that coats the inside of the nose can sometimes lead to internal damage and scarring. The nose might eventually collapse.

Leprosy can destroy the nerves responsible for blinking. This can lead to the eyes becoming dried out and prone to infection, potentially resulting in ulceration and blindness.

Types of leprosy

There are a number of approaches to classifying leprosy.

Some simply split the disease into two groups,

tuberculoid and lepromatous, with most types of leprosy being some mix of the two. Both types produce lesions on the skin, but the lepromatous form is more severe and causes the additional formation of large lumps and bumps.

Diagnosis of leprosy

A physician usually bases the diagnosis of leprosy on the visual recognition of the signs and symptoms. Laboratory tests are only necessary in rare cases.

In the countries where leprosy is most common, the presence of just one of the following symptoms is enough to make a diagnosis:

Multidrug therapy (MDT) of leprosy

- MDT is used to 'treat dapsone resistant strains of *M. leprae*' and to 'shorten the duration of treatment'.

Multidrug therapy (MDT) of leprosy		
	Multibacillary	Paucibacillary
Rifampin	600 mg once a month supervised	600 mg once a month supervised
Dapsone	100 mg daily self administered	100 mg daily self administered
Clofazimine	300 mg once a month supervised and 50 mg daily self administered	—
Duration	12 months	6 months
Doses to be reduced suitably for children.		

skin lesions consistent with leprosy and sensory loss, with or without thickened nerves positive skin smears
Treatment of leprosy

Treatment for leprosy consists of a multi-drug therapy approach that lasts between 6 and 12 months.

The first drug found to be effective, dapsone, has been in use since 1946. Later, some resistance to the drug was identified, and others were developed for use in cases where the disease was resistant. These drugs were rifampicin and clofazimine.

Today, all three drugs can be given in combination, depending on the severity of illness. This kills the *M. leprae* and *M. lepromatosis* bacteria and cures the patient.

The side effects of leprosy treatment are rare but can include:

Dapsone can lead to minor anemia

Rifampicin can trigger abnormal liver test results that clear up after the drug is stopped. It may also produce a harmless orange coloration of the sweat, urine, or tears.

Clofazimine might cause a slight darkening of the skin that returns to normal once treatment has stopped.

The stigma of leprosy

Leprosy is not particularly contagious, and once treatment has been underway for 2 to 4 weeks, the individual is no longer contagious at all. Despite this fact, so-called "leper colonies" still operate in India, China, and some African countries.

There is no medical reason for leprosy patients to be removed from society.

In these countries, the significant social stigma around leprosy makes life with the condition isolated and difficult.

Although organizations such as WHO are working tirelessly to reduce and eventually eradicate leprosy, the issue of stigma for sufferers of leprosy is proving harder to remove.

Individuals bearing the scars of leprosy can earn significantly less money, chances of marriage can be significantly reduced, mothers with the disease may stop breastfeeding their babies, and affected children can be shunned from their homes and villages permanently.

The emotional stress and anxiety of leprosy can cause mental health problems, leading to further

isolation and sometimes the cessation of treatment. Unemployment is common, and begging is often the only option left, adding to stress, marginalization, and feelings of worthlessness.

Because of the fear of this stigma, people who have contracted leprosy sometimes hide their symptoms and do not seek help or treatment. This allows the condition to worsen and increases the risk of complications. It also increases the chances of transmission to others in the community.

Prevention

The ideal ways to prevent the spread of leprosy are the early diagnosis and treatment of the condition in people to whom the disease has been transmitted.

However, due to poor medical infrastructure and the stigmas attached to leprosy, education, and provisions in various communities around the world are not enough to completely eradicate leprosy.

The following steps can be taken to promote the prevention of leprosy:

providing education and self-care support monitoring the condition and its symptoms on an on-going basis and referring severe cases managing day-to-day injuries and disabilities that develop educate locals about injury prevention and wound cleaning

Important progress has been made so far, but scientific and humanitarian education programs must continue to work in unison to minimize and eventually remove leprosy from the human experience.

of happiness and sadness.

Memories of happiness
is the life with cheerfulness
providing strength and energy
to move ahead in life,
making success in the long run.
to achieve the goal in life

Whereas never the less
The memories of sadness
fills life with struggles
providing strength to fight
To move ahead in life.

Making oneself strong enough
To stand in the long run.
making the path of life
Easier to stand still, till end.

Both shades of colours
are like teachers of life,
helping us to learn, how
to move ahead in life
which goes on continuously.

जिन्दगी है दो दिनों की
तेरे प्यार की कसम
आओ छाया की बाहों में
खुल जायेगी दुनिया में
दिल की धड़कन।

आवाज सुन रही हूँ तेरी
सपने में आ दिखाया
समुन्दर का पानी लहरने लगा
बिजली जैसे चमकी
आँखों की हर छाया।

असम में लगी
चाय पत्ती हरी हरी
पत्थर में भी भगवान है
इस दुनिया की गली गली।

पत्थर तब तक सलामत है
जब तक वह पर्वत से जुड़ा है
इन्सान तब तक सलामत है
जब तक वह परिवार से जुड़ा है।

!! देश के वीर जवान!!

उ.नि.(मंत्रा.) धर्मवीर
आसूचना शाखा, महानिदेशालय

कड़ाके की ठंड में भी सीना तान खड़े हुए
तपती गर्मी में भी सीमाओं पर अड़े हुए।
बांध शहादत का सेहरा, मृत्यु से ब्याह रचाते हैं
देश के वीर जवान देखें, माँ का ऋण चुकाते हैं।

तूफानों की चुनौती हो, चाहे बर्फीली हवा हो
चाहे आतंकियों की ओर से गोलियों की बौछार हो।
चाहे कैसी भी आपदा हो पर ये नहीं घबराते हैं
देश के वीर जवान देखो माँ का ऋण चुकाते हैं।

माता-पिता बच्चों से दूर, अपनी ड्यूटी करते हैं
दिल में कितना दर्द लिये, सीमाओं पर डटते हैं।
अपनी जान न्यौछावर कर आतंकियों को धूल चटाते हैं,
देश के वीर जवान देखो माँ का ऋण चुकाते हैं।

भारत माता के सच्चे पूत सर पर कफन बाँधे हैं,
नींद नहीं उनकी आँखों में, देश चैन से सोता है।
देश की रक्षा के लिए, वो शहीद भी हो जाते हैं
देश के वीर जवान देखो माँ का ऋण चुकाते हैं।

देकर वे कुर्बानी अपनी, जीवन औरों का बचाते हैं।
उनके बलिदान से, भारत माता धन्य हो जाती है।
ऐसे वीर सपूत तो शहीद होकर भी जी जाते हैं,
देश के वीर जवान देखो माँ का ऋण चुकाते हैं।
